DETAILED ACTION

Election/Restrictions

1. Newly submitted claims 22-23 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: these claims are directed to a method of forming a seat belt retractor, which would be classified in class 72, subclass 362, and are distinct from the product claims since the product as claimed can be made by another and materially different process such as by molding.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 22-23 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ono et al, of record, alone or in view of either of Swanson et al or Grady, both newly cited, for the reasons set forth in paragraph 6) of the previous Office action. Both Swanson et al and Grady disclose old and well known rib forming methods using punches as requested by applicant.

Art Unit: 3654

4. Claims 12, 14, 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ono et al for the reasons set forth in paragraph 6) of the previous Office action. With respect to claim 18 the ribs 21 of Ono et al are elongated axially and appear to be of constant width, Figs. 7A, 7B. In any event whether those ribs are of constant width would have been an obvious design consideration to one of ordinary skill in the art since they would function in the same manner whether of constant or varying width. With respect to claims 19-21 the particular shape of the rib again is an obvious design consideration to one of ordinary skill in the art, whether of quadrilateral cross section or otherwise, or of constant or varying width, for the reasons set forth previously.

Response to Arguments

2. Applicant's arguments filed 12/11/03 have been fully considered but they are not persuasive. Applicant argues that Ono et al does not show forming a rib by punching, and requests evidence that punching is well known in the metal working arts, that Ono et al does not disclose an arc-shaped rib, a rib that varies in width, is tapered, or is of quadrilateral cross-section configuration.

However, since applicant has failed to provide any explanation as to the criticalness of the particular claimed shapes the rejections are deemed proper. Regarding claims 10-11 applicant should note MPEP 2113 related to product by process limitations in a claim. If the end product is the same whether made by different processes the claims would be unpatentable. With respect to the other rejected claims see MPEP 2144, paragraph IV, subparagraph B. Changes in Shape. See also In re Kuhle, 526 F.2d 553, 188 USPQ 7 (CCPA 1975).

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
